1 STATEMENT

NeuroStat Org. wants every employee and contractor to go home in the same condition as they arrived. We run our laboratories, offices, field sites and travel on that basis.

2 WHAT WE DO

- We assess risks before work starts and stop work that cannot be done safely.
- Everyone has the right and the duty to stop work they believe is unsafe. Nobody is disadvantaged for doing so.
- We report incidents and near misses, investigate them and share what we learn.
- We train people for the work they do and check that training is current.
- We keep our emissions, waste and energy use under review and set targets each year.

3 OFFSHORE AND REMOTE WORK

Staff on offshore installations and other remote sites follow the rules of the operator of the site. Where our rules and the operator's differ, the stricter rule applies.

4 REPORTING

Report incidents and near misses on the Incident Report form (NS-FRM-IR-02) or by phone to the manager. Emergencies go to the local emergency number first.
