Production Targets and Cost Reduction, Winter 2028/29

Doc. NS-CFO-FIN-2028-10 · 9 October 2028

Classification: Confidential, management

1. Targets

Period	Production (boepd)	Availability	Opex plan (CHF m)
Q4 2028	9,800	94 %	31.2
Q1 2029	9,600	93 %	32.0
Q2 2029	9,900	95 %	30.1

2. Cost reduction

The group target is a 6 percent reduction of operating cost on a full-year basis from 2029, compared with the 2028 budget. The reduction is to come from procurement, logistics and overhead.

3. Instruction

Production is to be maintained at plan level throughout the winter rotation. Cost reductions must not reduce production availability or safety-critical maintenance. Where a cost measure and the production plan conflict, the production plan applies and the conflict is reported to Finance.

4. Reporting

The Production Superintendent reports actual production and cost against the plan on the first working day of each month.
