Half-year report 2028

Revenue of CHF 603 million, core operating profit up 6 percent.

Key figures

CHF million	H1 2028	FY 2027	FY 2026
Revenue	603	1,184	1,149
Core operating profit	171	322	296
Net profit	118	231	187
Research and development	162	318	301

Business review

Revenue rose 4 percent at constant exchange rates. Lunavel grew 9 percent. NeuroStat Baseline and Halo grew 14 percent together. Vesperil sales declined as generic ormelteon reached more markets.

Core operating profit rose 6 percent to CHF 171 million. Research and development spending was CHF 162 million, with Phase III costs for NS-091 and the start of the BOREAS-2 Phase II study as the main drivers.

Pipeline

BOREAS-2 began recruitment in September 2028. NS-529 entered Phase I in November 2027. The next-generation Halo has been submitted for CE marking.

Outlook

NeuroStat confirms its guidance for 2028: low single-digit revenue growth at constant exchange rates and a core operating margin of about 27 percent.

This document contains forward-looking statements. Actual results may differ materially. NeuroStat does not undertake to update them except where required by law.
